PROFILE

Technical Project Specialist on PatientFi's development team, leading a cross-functional program to bring loan servicing in-house. Certified ScrumMaster with 10+ years of customer-facing experience and a track record of growing into bigger roles — from customer support to AI implementation to engineering-side project management. Translates business priorities into scoped, trackable work, and is building full-stack engineering skills to work even closer to the code.

EXPERIENCE

PatientFi

Irvine, CA · Hybrid

Technical Project Specialist PROMOTED — Jul 2026 – Present

- Project manager for a company-wide initiative bringing loan servicing in-house — a role created to lead it.
- Coordinate parallel workstreams: LoanPro servicing platform, custom integrations on PatientFi's own platform, Prodigal AI voice/chat and automated collections, AWS-based telephony, credit reporting, and legal & compliance.
- Manage data-sync dependencies and handoffs across roughly five partner companies and internal engineering squads.
- Partner with Technical Analysts to scope, prioritize, and assign development work; publish weekly status reports on milestones, risks, and blockers to stakeholders.

AI Onboarding & Training Specialist PROMOTED — Jul 2025 – Jul 2026

- Designed the conversational logic for customer-service AI across chat, email (Zendesk AI Agents via Ultimate), and voice (PolyAI).
- Led the CX team rollout of Zendesk's AI suite, including Copilot; tracked usage and agent feedback to iterate on configuration and adoption.
- Wrote SOPs and internal/external help center articles, and ran team-wide training sessions for each new tool.
- Consolidated a 248-intent bot library into a structured handoff document to support a vendor transition.

Customer Experience Agent — Jul 2024 – Jul 2025

- Resolved patient-financing inquiries while taking on AI tooling initiatives beyond the role, leading to promotion.

Apple Inc.

Mission Viejo, CA

Genius — 2017 – 2024

- Mentored and coached Genius Bar teammates, regularly taking on responsibilities beyond the role to support store priorities.
- Applied systematic troubleshooting and root-cause analysis across iPhone and Mac hardware and software.
- Resolved complex customer escalations through deep product knowledge and clear, calm communication.
